No. is the number of results predicted by chance to have a
core greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                  US-10-004-551-6
